The Micro, Small and Medium Enterprises (MSMEs) in India have undergone a vast development in the last five decades. The MSMEs have registered tremendous growth as also the progress in terms of quality production, exports, innovation, product development and import substitution, very much beyond the expected objectives of setting up MSEs by the planners of industrial production base in the country. Entrepreneurial efforts have made it possible to produce number of items, which hitherto were imported. In quite a few cases new variants so produced are having additional attributes than their original versions and are capable of solving a multitude of user problems. Ministry of MSME, Government of India has launched various schemes to enhance competitiveness of MSMEs including Lean Manufacturing scheme.

The objectives of Lean Manufacturing Scheme are to increase the competitiveness of the MSME sector through the adoption of LM techniques with the objective of :

MSMEs implement the LM techniques for reducing their manufacturing costs through proper personnel management, better space utilization, scientific inventory management, improved process flows, reduced engineering time etc. Such LM techniques also help in improving the quality of the final product. Large enterprises are capable of taking initiative on their own which essentially involves engaging the services of LMCs (Lean Manufacturing Consultants).
